OBSERVATOIRE DE MARCHÉ DU SERVICE ROAMING

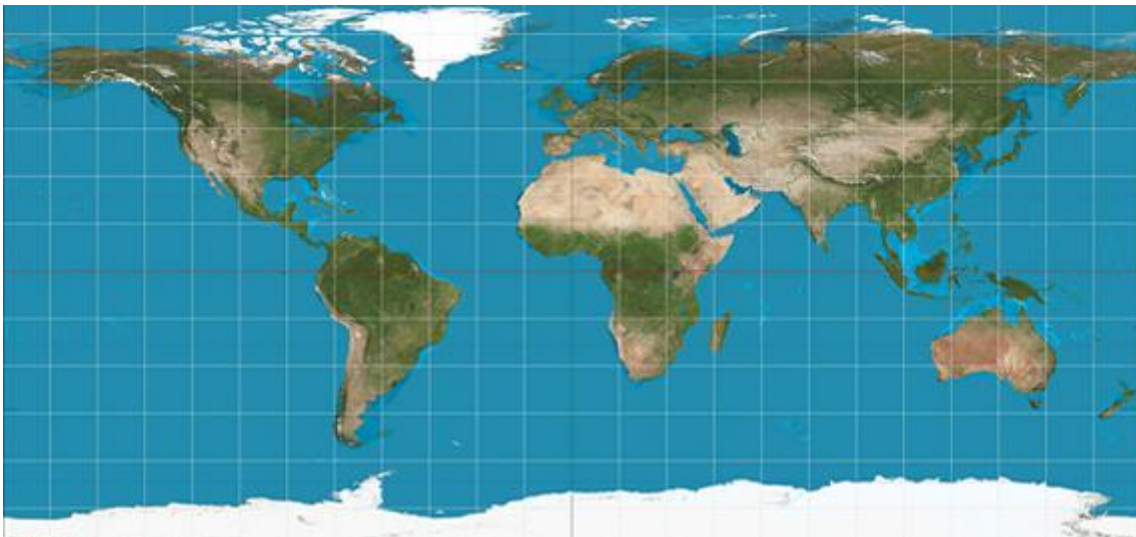

Au Burundi, le service roaming international est exploité par trois opérateurs sur quatre inscrits et œuvrant sur le territoire national. Il s'agit des opérateurs privés : LACELL, VIETTEL et ECONET LEO.

0. Définition du concept

0.1. Qu'est-ce que le *roaming*?

Le **Roaming** signifie littéralement « **itinérance** » en français.

Bien que le concept de *roaming* englobe toute la technologie sans fil, comme les réseaux Wifi, dans le cas présent, l'itinérance fait référence à l'**utilisation des points de couverture d'autres opérateurs de téléphonie mobile**.

Grâce à l'itinérance, vous pouvez communiquer depuis n'importe quel pays (Image: [Wikipedia](#))

Autrement dit, dès que vous sortez de votre pays, pour passer des appels, envoyer des messages ou naviguer sur Internet avec votre connexion 2G/3G/4G grâce à l'option d'itinérance, votre appareil va emprunter les réseaux disponibles des **fournisseurs locaux**.

Ce service roaming permet d'utiliser facilement **votre portable et votre carte SIM à l'étranger**. Mais en contrepartie, il peut arriver que votre fournisseur téléphonique ne dispose pas d'un tarif très compétitif et vous présente à la fin du mois une **facture exorbitante**.

0.2. Comment activer et désactiver le service de *roaming*?

Il existe **deux façons** d'activer et de désactiver l'itinérance sur votre mobile. D'une part, **en contactant votre opérateur téléphonique** et, d'autre part, en configurant manuellement votre appareil.

Dans le premier cas, consultez la **page officielle de votre opérateur** de téléphonie ou appelez le service client. Parfois, il se peut que l'option soit activée par défaut ou vous devrez le demander. De la même manière, vous pourrez avoir à exiger qu'on vous le désactive¹.

0.3. TYPES DE ROAMING

On distingue deux types de roaming:

0.3.1. L'itinérance de clients étrangers (inbound roaming) :

L'opérateur A accueille les abonnés de l'opérateur étranger B : **l'opérateur A va facturer leur opérateur** en fonction de leur utilisation (appels entrant et sortant) de son réseau.

• **Exemple** : Pour un opérateur burundais, un abonné kenyan (réseau d'origine de l'opérateur B) visitant le Burundi et utilisant son téléphone mobile pour passer et recevoir des appels via le réseau de l'opérateur burundais A (réseau visité).

0.3.2. L'itinérance depuis l'étranger (outbound roaming)

Les abonnés de l'opérateur A sont accueillis par l'opérateur étranger B : l'opérateur A est facturé par l'opérateur B pour ses abonnés utilisant le réseau étranger (appels entrant et sortant), sur base des justificatifs reçus de l'opérateur étranger.

Exemple

Pour un opérateur burundais A : un abonné de l'opérateur A (réseau d'origine) qui utiliserait son téléphone mobile en itinérance au Kenya pour passer et recevoir des appels via le réseau de l'opérateur B (réseau visité)

Le prix unitaire moyen pondéré est 2 733 Fbu par minute d'appel utilisé par un abonné du Burundi en visite à l'étranger.

3. Tarifs roaming appliqués au sein de la sous-région de l'EAC

Dans le cadre de l'application du Réseau Unique (One Network Area « ONA ») résultant de la résolution des Chefs d'Etats, une décision de se fixer sur les principes directeurs relatifs aux tarifs plafonds par minute (price cap): le tarif de détail et le tarif de gros (IOT) a été prise comme suit:

- le trafic est exempté de taxes appliquées sur le trafic international entrant et international sortant;
- Le tarif régional de détail est plafonné à **0,10 USD par minute** y compris les taxes applicables dans chaque pays;

- Le taux de détail comprend un tarif inter-opérateurs (IOT) plafonné à **0,07 USD par minute** toute taxe applicables dans chaque pays incluse;
- Il ne doit y avoir aucune surcharge pour recevoir un appel en itinérance (roaming) dans la région de l'EAC;

Cette tarification concerne les pays de l'EAC ayant déjà implémenté, le réseau ONA. Tous les pays de l'EAC ont déjà implémenté ledit réseau unique.
